

FreeMotion
Reclining Furniture...Unplugged
by  **Parker House**
FURNITURE

All batteries come with **UL Certification** and a **5 Year Warranty**. They can be charged, while simultaneously being used (a feature not available on many batteries currently in the marketplace).

1. P25

- a. 2500 mAh (***25% larger than the competition***)
- b. Up to 450 single motor cycles on a single charge
- c. Powers up to 2 modular pieces with up to 6 motors
- d. 12.5A instantaneous discharge current (compared to competitor's 6A discharge). Higher discharge equates to longer overall life of battery, increased reliability and safety.

2. P50

- a. 5000 mAh (***25% larger than the competition***)
- b. Up to 900 single motor cycles on a single charge
- c. Powers up to 4 modular pieces with up to 9 motors
- d. 25A instantaneous discharge current (compared to competitor's 12A discharge). Higher discharge equates to longer overall life of battery, increased reliability and safety.

3. P75

- a. 7500 mAh (***25% larger than the competition***)
- b. Up to 1350 single motor cycles on a single charge
- c. Powers up to 5 modular pieces with up to 12 motors
- d. 37.5A instantaneous discharge current (compared to competitor's 18A discharge). Higher discharge equates to longer overall life of battery, increased reliability and safety.

Accessories

- 1. Y1 Kit – connects 2 modular pieces, less than 3' apart, to one FreeMotion battery
- 2. Y2 Kit – connects 2 modular pieces more than 3' apart, to one FreeMotion battery
- 3. Y3 Kit – connects 3 modular pieces to one FreeMotion battery
- 4. PB – this is a universal bracket to hold FreeMotion batteries and can easily mount under the backflap of any motion furniture

Customer can connect 4 or 5 modular to one FreeMotion battery pieces by adding additional Y1 cables
